

Device identification

Part number	MEG50 _ - _ - _ - _ -
Serial number (from rear panel)	_ - - _ - - - -

Configuration data

Date [dd/mm/yy]	/ /	/ /	/ /	/ /	/ /	/ /	/ /	/ /
V_M – Main (avionics) output voltage [V]								
I_B – Battery charging current limit [A]								
I_G – Input (generator) current limit [A]								
P_G – Input (generator) power limit [W]								
P_P – Packet period [seconds]								
I_0 – Battery current offset calibration value								
T_0 – Temperature offset calibration value								
T_U – Upper temperature limit [°C]								
CAN streaming settings [bitfield] ^{Note 1}								
CAN serial number [16-bit integer] ^{Note 1}								

Note 1: Only applicable to devices fitted with a CAN interface.

Firmware updates

Date [dd/mm/yy]	/ /	/ /	/ /	/ /	/ /	/ /	/ /	/ /
Firmware version [XX.XX]
